

Higher Degree in Transplantation Science for Transplant Clinicians from University of Liverpool (subject to approval)

We are proud to launch our new on-line transplantation science module, which has been developed by a multi-professional team of experts. The material is delivered *wholly* online and successful completion of the module leads to the award of 30 academic credits at Masters level (level 7). This module will commence on Monday 26th January 2015 and will run for 26 weeks.

This education is suitable for both surgeons and physicians.

This module is the first of 4 modules, which focus on transplantation science. All of the modules will be 30 credits each, at Masters level (level 7). Subject to approval, these modules can contribute to a Postgraduate Certificate/Diploma/MSc in Transplantation Science. Alternatively, this module can be taken as stand-alone Continuing Professional Development.

Enquiries about the course should be made via Mr Ahmed Halawa, Consultant Transplant Surgeon, UK at ahmed.halawa@sth.nhs.uk
